Amazon Campus Mentorship Series (ACMS) is a diversity initiate to help women in tech to integrate into business through a series of workshops, trainings and business communication. This follows the model of classroom based learning facilitated by Amazon leaders and spans over 4 classroom sessions over a course of 24 weeks. Each session is of 4-6 hours duration. Along with these sessions, students are grouped and assigned a small project to give them an opportunity to apply the learning. Mentoring is one the key factors and each group is assigned a mentor. These mentors work with their respective groups for the entire duration and help the students in completing their assigned projects. Once the course is completed, all participants make a project presentation and go through the interview process. Candidates who clear final interviews will receive 6-month internship offer from Amazon. ACMS mentorship sessions will be conducted in 3rd Year (6th Sem) and internship for the selected candidates will be in their 4th year (8th Sem).

Note: selected Candidates will have to travel to Amazon's facility in Chennai twice during the course of the ACMS

All the Female Candidates should make use of this wonderful opportunity.
