Regulations for B.Sc. (Allied Health Science) Course: 2017

Introduction

B.Sc. (Allied Health Science), a (3-year course work + 1-year internship) program under the Faculty of Allied Health Sciences, is aimed at training students to prepare them as qualified physician assistants who will be able to meticulously assist the concerned specialist in handling the various illnesses. This program is a taught course that covers relevant topics and specialized areas of knowledge as opted. The aim of this B.Sc. Program is to provide a thorough training to the candidates through formal lectures and/or seminars and practical programs which culminate in a one year internship that finally prepares the student for the rigors of the medical world.

1. Short Title and Commencement

These Regulations shall be called the “Regulations for B.Sc. (Allied Health Science) Course” of BIHER. These regulations shall be deemed to have come into force from the academic year 2017-18. These regulations are subject to modifications as may be approved by the Academic council from time to time.

2. Eligibility for Admission

a) A candidate desiring to join the (3-year course work + 1-year internship) programme, leading to the degree B.Sc. (Allied Health Science) should have passed the HSC/CBSE/ISC or equivalent examination with one of the following subject combinations:

   i) Physics, Chemistry, Biology
   ii) Physics, Chemistry, Botany and Zoology

b) A candidate shall, at the time of admission submit to the Head of the Institution, a certificate of medical fitness from an authorized Medical Officer certifying that the candidate is physically fit to undergo the academic course and does not suffer from any disability or contagious disease.

3. Age limit for admission

A candidate should have completed the age of 17 years as on 31s December of the year of admission.

4. Eligibility Certificate

Candidates, who have passed any qualifying examination other than the Higher Secondary Course examination conducted by the Government of Tamil Nadu, shall obtain an Eligibility Certificate, from BIHER and produce the same at the time of admission.

5. Registration

A candidate admitted to the course shall register his/her name with the University by submitting the application form for registration, duly filled in along with the prescribed fee, through the Head of the Institution within the stipulated date.
6. Duration of the course

The duration of the B.Sc. (Allied Health Science) Degree Course shall be (3-year course work + 1-year internship) comprising of 8 (eight) semesters and one year (semesters 7 & 8) of compulsory internship. The candidate is required to pursue the course on a full time basis, and must complete the course within seven years from the date of provisional registration.

7. Commencement of the Course

The course shall ordinarily commence on 1st August of the academic year. Admission for the said course shall be completed by 31st August.

8. Curriculum

The first three years of the course will be utilized as follows:

The first two semesters will be spent on Pre and Para clinical subjects including Anatomy, Physiology, Biochemistry, Basics in Medical Physics, English, Computers, Microbiology, Pathology, Pharmacology, Environmental Science and Community Medicine and Nursing. At the beginning of the third semester students will be assigned to branch of Specialization, to which allotted and they will proceed with the specialty during the third, fourth, fifth and sixth semesters,

The fourth year of the course shall be compulsory internship in the respective specialty. The Syllabus for the course shall be as specified in the regulation.

9. Medium of Instruction

English shall be the medium of instruction for all the subjects of study and for the examination.

10. Working Days

In the case of I to VI semesters, each semester shall consist of not less than 100 working days and each academic year shall have a total of 200 working days or above. In the case of VII & VIII semesters, each semester shall have 140 working days.

11. Attendance

The candidate shall have not less than 80% attendance in Theory and Practical separately. Each semester shall be taken as a unit for the purpose of calculating the attendance. The candidate lacking attendance in a subject shall be denied permission to appear for the University Examination in that subject.

12. Condonation of Lack of Attendance

The discretionary power of condonation of shortage of attendance to appear for University Examination rests with the University.

Lack of attendance can be condoned up to a maximum of 5% of the minimum attendance required in the following exceptional circumstances:

(i) Any illness / accident (for which Medical certificate from a registered medical practitioner must be produced)
(ii) Any unforeseen tragedy in the family (should produce the letter from the parent/guardian)

(iii) Participation in NCC/NSS and other co curricular activities representing the Institution / University. (Certificate from competent authority is required)

For any of the above reasons, request shall be made by the candidate with prescribed fees to the Controller of Examination through proper channel, ten days prior to the commencement of the theory examination.

13. Commencement of the examinations

There shall be two sessions of University examinations in an academic year, viz., December and June.

14. Cut-off dates for admission to the examinations

The candidates admitted from 1st August to 31st August of the academic year shall be registered to take their first semester examination in the month of December of the academic year after fulfillment of the stipulated regulations.

15. Grading system

All assessments of a course shall be done on absolute marks basis. However, for the purpose of reporting the performance of a candidate, letter grades, each carrying certain points, will be awarded as per the range of total marks (out of 100) obtained by the candidate, as detailed below:

<table>
<thead>
<tr>
<th>Marks</th>
<th>Grade Points</th>
<th>Letter grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>90-100</td>
<td>10.0</td>
<td>O</td>

</tr>
</tbody>
</table>

Incomplete 0 I denotes not eligible to appear for the End-Semester examination.

Not appeared 0 NA denotes that the student did not appear for the examination although eligible.

"O" Outstanding

"RA" Reappearance denotes failure and the candidate is required to reappear for that examination.

"I" Incomplete denotes not eligible to appear for the End-Semester examination.

"NA" Not appeared examination although eligible.
After results are declared, Grade Statement will be issued to each student which will contain the following details:

- The college in which the candidate has studied
- The list of subjects enrolled during the semester and the grades scored.
- The Credits awarded and accumulated.
- The Grade Point Average (GPA) for the semester and
- The Cumulative Grade Point Average (CGPA) of all subjects enrolled from first semester onwards.

GPA is the ratio of, the sum of the products of the number of credits of subjects (C) and the grade points scored in those subjects (GP), to the sum of the credits of all the subjects in that semester.

\[
GPA = \frac{\text{Sum of } [C \times GP]}{\text{Sum of } C}
\]

CGPA will be calculated using the above formula, considering all the subjects enrolled from first semester onwards. “RA”, “I” and “NA” grade will be excluded for calculating GPA and CGPA.

16. Classification of successful candidates

The CGPA arrived at the completion of the course shall be the criteria for the classification of successful candidates as below:

<table>
<thead>
<tr>
<th>CGPA (Percentage)</th>
<th>Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>10.0 (90-100%)</td>
<td>First class with honors</td>
</tr>
<tr>
<td>8.0-9.9 (75-89%)</td>
<td>First class with Distinction</td>
</tr>
<tr>
<td>6.5 to 7.9 (60-74%)</td>
<td>First class</td>
</tr>
<tr>
<td>4.5 to 6.4 (40-59%)</td>
<td>Second class</td>
</tr>
</tbody>
</table>

a) Successful candidates who secure 75% marks and above as a course aggregate in the first appearance taking University theory, practical, project / dissertation evaluation and viva shall alone be awarded Distinction. This will also apply for award of University rank.

b) Successful candidates who secure 60% marks and above as a course aggregate in the University theory, practical, project / dissertation evaluation and viva shall be awarded First Class.

c) All others who secure 40-59% in gross percentage will be classified to have passed in Second Class.

17. Continuous (Internal) Assessment

a. Continuous (Internal) Assessment for Theory shall be the average of the best two out of three.
b. Continuous (Internal) Assessment for Practical’s shall be the average of the best two out of three.

c. The minimum Internal Assessment will be 40% separately for Theory & Practical

18. Semester – End Examination (University/Department)

a) The examination in B.Sc. (Allied Health Science) shall consist of Written Theory examinations and Practical Examinations. The semester – End Examination (University / Department) shall be conducted at the end of each semester.

b) Papers for which Internal Examination is recommended by the Board of Studies and approved by the Academic Council, the following criteria shall be followed.

i) The weight age for Continuous (Internal) Assessment and Internal Examination (to be conducted by the respective department) shall be in the ratio of 25% and 75% respectively.

ii) The Continuous (Internal) Assessment marks shall be the average of the best two out of three. The date of Semester – End Examinations (Internal examinations) shall be as per the University guidelines.

19. EXAMINATION PATTERN (for all specialties) (with practical) – UNIVERSITY EXAM.

<table>
<thead>
<tr>
<th>A. Theory</th>
<th>Max. Marks – 60</th>
<th>Duration: 2 1/2 hrs</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

B. Practical

I. Practical (Including Oral) | 20 Marks |

C. Continuous (Internal) Assessment

I. Theory | 10 Marks |
II. Practical | 10 Marks |

Internal Examination

Short Notes or Short Answers | 8×5 = 40 |

IA | = 10 |

Total | 50 |

20. Marks Qualifying for a Pass

For passing the University / End-semester Examination from Semester I to Semester VI, the candidate shall secure the marks as stated below,

a) 40% minimum in the End-Semester examination as well as 40% aggregate marks (continuous assessment and End – Semester examination). The minimum marks for internal assessment shall be 40%.

b) For papers which are internally evaluated the same distribution of 25% for Continuous (Internal Assessment and 75% for Semester – end Examination (which shall be conducted by the respective department) shall be followed.
21. Carry-over of failed subjects

A candidate, who fails in any one or more of the first year subjects, shall be permitted to carry over the subjects to the second year. However a candidate should clear all the subjects of the second year along with the carried over subjects of the first year before getting promoted to the third year. The student shall start the Internship training (VII & VIII semester) only after he/she clears all the papers from Semester I to Semester VI.

22. Revaluation of answer papers

There shall be no revaluation of answer papers of failed candidates. Failed candidates are however, permitted to apply to the University for retotalling within fifteen days of publication of the results for retotalling.

23. Temporary break of study

a) A candidate is not normally permitted to temporarily break the study.

b) If a candidate is continuously absent from the institute for one year without any information / permission.

   i) Having notified the Dean/Director/Principal within this period, this absence shall be treated as “Temporary Break of Study”.

   ii) Without notifying the Dean/Director/Principal, his/her name will be removed from the institute rolls.

c) If a candidate is compelled to temporarily break the study for valid reasons (such as accident or hospitalization due to prolonged ill health), he/she shall apply for condonation of the break to the Dean/Director/Principal through the Head of the Department.

d) For condonable break of study:

   i) If the lack of attendance is within condonable limits as per Clause No. 12 the candidate shall be permitted to write the examination for the current semester.

   ii) If there is non-condonable lack of attendance, the candidate shall rejoin the program at the respective semester as and when it is offered after the break and shall be governed by the rules and regulations in force at the time of rejoining.

e) The total period for completion of the programme reckoned from the commencement of the semester to which the candidate was first admitted shall not exceed the maximum period specified in Clause No. 6 irrespective of the period of break of study in order that he/she may be qualified for the award of the degree.

f) In any case, a candidate shall be permitted to temporarily break the study only once during the entire duration of the program. The candidate shall forfeit the registration in case of a second break or in case of a non-condonable break of study.

g) Without prejudice to the above rules, the candidate who has completed the attendance requirement for a semester, but has proceeded on a condonable break of study without appearing for the University Examination, shall be permitted to appear for the examinations without repeating the semester and thereafter continue the subsequent semester.

B.SC. ALLIED HEALTH SCIENCE 2017

ANESTHESIA & OPERATION THEATRE TECHNOLOGY

An ALLIED HEALTH SCIENCE professional is an important part of a multidisciplinary Health care team who provide support service and rehabilitation measures for the patients in the hospital.

Duration of the course: Three years followed by one year internship which is compulsory

Medium of instruction: ENGLISH

The first & second Semester syllabi for Allied Health sciences is common for all the courses.

FIRST YEAR: (Semester I & II)

MAIN SUBJECTS:

<table>
<thead>
<tr>
<th>Anatomy</th>
<th>Physiology</th>
<th>Biochemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pathology</td>
<td>Microbiology</td>
<td>Pharmacology</td>
</tr>
</tbody>
</table>

SUBSIDIARY SUBJECTS:

English, Computer, Medical physics, Environmental Science & Community, Medicine & Basics of Nursing.

Exams in subsidiary subjects shall be conducted at the college level and marks forwarded to the university.

INTERNAL ASSESSMENT:

1. Written tests-average of 2 tests, viva, assignments, aptitude, punctuality and Attitude.

2. Log book-It will have the recordings, of all activities department and date wise including practical demonstrations. There will not be a practical record

INTERNAL ASSESSMENT MARKS:

1. Written test etc.................. 10
2. Log book & Practical.......... 10
   Total 20

80% ATTENDANCE & 40% of INTERNAL ASSESSMENT marks are essential to appear for the University Examination

University Exams shall be conducted at the end of each semester. (JUNE & DEC)
SCHEME OF EXAMINATION - SEMESTER I
(COMMON TO ALL COURSES FOR ANAESTHESIA TECHNOLOGY, CARDIAC TECHNOLOGY, MEDICAL LABORATORY TECHNOLOGY, RENAL DIALYSIS TECHNOLOGY, RADIOLOGY AND IMAGING SCIENCE TECHNOLOGY, PERFUSION TECHNOLOGY, RESPIRATORY CARE TECHNOLOGY)

Total 24
ANESTHESIA & OPERATION THEATRE TECHNOLOGY
SYLLABUS - SEMESTER – 1

1. ANATOMY (UE)

UNIT I: Organization of the human body

1. Introduction
- Introduction to human body
- Definition and subdivision of anatomy
- Anatomical position and terminology
- Region and systems of the body
- Cavities of the body and their contents
- Levels of organization of the body

2. Cell and genetics
- Parts of cell – cell membrane, cytoplasm, organelles, inclusion bodies, nucleus
- Structure of chromosome, DNA, RNA.
- Basics & fundamentals of Genetics, Karyotyping, Chromosomal disorders, prenatal diagnosis, genetic counseling and gene therapy.
- Cell division – Definition and main events that occur in different stages of mitosis and meiosis.
- Tissues – Definition, characteristic features and types with example.
- Types of glands with example

UNIT II: Systems of support and movement

1. Skeletal system
- Cartilage: Type and basic histological feature.
- Bones: definition, classification based on location, name and number of bones with general feature of important bones, function of bone, histological feature of a compact bone.
- Joints – Definition and types with example, Axis and movements. Shoulder, elbow, hip, knee joints – type, bones and ligaments involved, possible movements.

2. Muscular system
- Types of muscle with basic histological features
- Parts of skeletal muscle.
- Definition of origin and insertion
- Origin, insertion, nerve supply, action of sternocleidomastoid, pectoralis major, deltoid, gluteus maximums and diaphragm.
UNIT III: Controls systems of the body

1. Nervous system
   - Subdivisions of the nervous system
   - Spinal cord-location, extent, external features and blood supply
   - Brain-subdivision, location, external features of Medulla oblongata, Pons, Midbrain, Cerebellum, and Cerebrum, Thalamus and Hypothalamus, Location and subdivision of ventricles of brain. Circle of Willis.
   - Cranial nerves-name, number, attachment, area of distribution
   - Spinal nerves-typical spinal nerve. Name and location of plexuses. Location and distribution of brachial and lumbosacral plexus.
   - Autonomic nervous system-sympathetic and parasympathetic nervous system. Location of pre-ganglionic and post-ganglionic neurons.

2. Sense organs
   - Location and features of nose, tongue, eye, ear and skin.

3. Endocrine system
   - Names of the endocrine glands. Location and features of pituitary, thyroid, parathyroid, suprarenal, pancreas, ovaries and testis. Names of hormones produced by each gland.
   - Microscopic features of thyroid and pancreas.

UNIT IV: Maintenance of the human body

1. Cardio vascular system
   - Types and general features of blood vessels. Structure and types of arteries and veins. Shape, size, location, covering, external and internal features of Heart. Conducting system of heart. Blood supply of the heart. Name, location, branches and main distribution of principal arteries and veins

2. Lymphatic system
   - General features of Lymph node and lymphatic vessels. Name, location, external features, microscopic feature of tonsil and spleen.

3. Respiratory system
   - Name the organs of respiration. Location and features of Nasal cavity, pharynx, larynx, trachea, lung & pleura. Mention the microscopic feature of lung.

4. Digestive system
   - Name the parts of the alimentary canal and accessory organs. Location & features of esophagus, stomach, small and large intestine. Location and feature of tongue, salivary glands, pancreas, liver and gall bladder. Microscopic feature of liver.
5. **Urinary system**

6. **Reproductive system**
   • Names of male and female organs of reproduction. Location and features of testis, epididymis, vas deferens, prostate gland and spermatic cord. Location & features of uterus, uterine tube, ovary and breast.

7. **Embryology**

**UNIT V: Anatomical regions**
   • Simple ideas about scalp, triangles of neck, axilla, cubital fossa, carpal tunnel, mediastinum, umbilicus, inguinal canal, femoral triangle
   • Sub sartorial canal popliteal fossa

**PRACTICALS/DEMONSTRATIONS**
1. Demonstrations of dissected specimens.
2. Viewing of projection of microscopic slides of muscle, bone, cartilage, spleen, tonsil, lung, liver, kidney, thyroid and pancreas

**REFERENCE BOOKS**
2. *Handbook of anatomy for nurses by Dr. P. Saraswathi*
2. PHYSIOLOGY (UE)

UNIT-I

1. General Physiology:
   - Concept of Homeostasis
   - Cell structure and functions
   - Transport across membranes
   - Body structure and body fluids:
     - Blood fluid volumes, compartments and composition
   - Blood composition and functions
   - Plasma proteins – Types and functions
   - Erythrocytes – functions, Erythropoiesis, anemia’s
   - Leucocytes – classification and functions
   - Platelets – morphology and functions
   - Blood coagulation – Mechanism and name of anticoagulants
   - Blood groups – Basis of ABO & Rh grouping, Erythroblastosis Foetalis

2. Muscle physiology:
   - Muscles – Classification & structure of striated, nonstriated & cardiac muscle
   - Neuromuscular junction
   - Mechanism of skeletal muscle contraction

3. Digestive system:
   - Salivary glands, functions of saliva
   - Parts of stomach, composition & functions of gastric juice
   - Pancreatic Juice – composition & functions
   - Bile – composition & functions of bile & bile salts
   - Functions of Small intestine & large intestine

UNIT-II

1. Skin
   - Structure & Functions

2. Excretory system:
   - Kidney: Basic physiological anatomy (Including JGA)
   - Formation of urine – GFR
   - Formation of urine – Reabsorption & secretion
   - Micturition Reflex
• Dialysis – Principle, types
• Renal function tests

UNIT-III

1. **Endocrine system:**
   • Hypothalamo hypophyseal inter relationship
   • Posterior pituitary hormones and its actions
   • Anterior pituitary hormones, Growth hormone – Actions
   • Dwarfism, gigantism, acromegaly
   • Thyroid hormones – Actions
   • Cretinism, Myxoedema, Grave’s disease (clinical features)
   • Parathyroid hormones – Functions, Tetany
   • Insulin, Glucagon’s – Actions, Diabetes mellitus
   • Adrenal medullary hormones & their actions
   • Adrenal cortex hormones & their actions

2. **Reproductive system:**
   • Male reproductive organs – Spermatogenesis, Testosterone actions
   • Female reproductive organs – menstrual cycle (endometrial and ovarian cycles) and its hormonal control
   • Contraceptive methods in male and female

UNIT-IV

1. **Respiratory system:**
   • Basic physiological anatomy
   • Surfactant
   • Mechanics of respiration
   • Lung volumes and capacities
   • Oxygen transport, Carbon-di-oxide transport
   • Nervous and chemical regulation
   • Pulmonary function tests.

2. **Cardiovascular system:**
   • Basic physiological anatomy, innervations of heart
   • ECG – normal waves, intervals and their significance
   • Cardiac cycle – mechanical events, Heart sounds
   • Blood pressure – Definition, measurement, normal values, factors maintaining BP Regulation
UNIT-V

1. **Nervous system:**
   - Structure of neuron, neuroglial cells, synapse and transmission across it
   - Reflex – Components of reflex arc, examples.
   - Functions of ascending tracts – anterior, lateral spinothalamic tracts, Dorsal column
   - Functions of Corticospinal (Pyramidal) tract-Descending tract
   - Functional areas of cerebral cortex
   - Functions of basal ganglia, thalamus, hypothalamus, limbic system and cerebellum

2. **Special senses:**
   - Receptors for various special senses

**Practical Demonstration**

**Hematology :**
1. Enumeration of RBC count.
2. Enumeration of WBC count.
5. Determination of blood group.
6. Determination of bleeding time and clotting time.

**Clinical physiology :**
1. Measurement of blood pressure.
2. Determination of Radial pulse

**REFERENCE BOOK**
3. BIOCHEMISTRY (UE)

UNIT I – Cell and its molecules

Cell – Cell organelles, Fluid Mosaic Model, functions of cell membrane, Brief description of transport across the cell membrane.

Carbohydrates – Definition, Classification with examples, Sources, physiological significance and HbA1c.

Lipids – Definition, Classification with examples, Sources, Types of lipids present in the body, storage form, storage site, free cholesterol structure, functions of lipids, lipoprotein structure and its functions.

Nucleic acids – Nucleotide, Nucleoside, types of nucleic acids, secondary structure of DNA & Its functions; Types of RNA & its functions.

UNIT II – Proteins and Enzymes

Proteins – Definition, Classification, functions of proteins, Plasma proteins; Classification of Amino acids with examples

Hemoglobin structure, Functions of hemoglobin, hemoglobin derivatives, abnormal hemoglobin

Enzymes: Definition, Classification, coenzymes, Metalloenzymes, Factors affecting enzyme activity, Regulation of enzymes, over view of Mechanism of enzyme action, Isoenzymes and Clinical importance of enzymes

UNIT III - Vitamins, Minerals, Nutrition

Vitamins: Definition, Classification of Vitamins

Sources, RDA, Function & Deficiency symptoms of

- Fat Soluble Vitamins (A, D, E & K);
- Water Soluble Vitamins (Thiamine, Riboflavin, Niacin, Biotin, Pantothenic acid, Pyridoxine, Folic acid, Cobalamine) and Vitamin C

Minerals: Definition, Classification of Minerals

Sources, RDA, Function, Reference levels & Deficiency Symptoms of

- Calcium, Phosphorus, Iron Copper, Zinc, Sodium, Chloride, Iodine, Potassium, Fluorine and Selenium.

Nutrition: BMR, SDA, Dietary fibres, protein Energy Malnutrition and Obesity

UNIT IV – Bioenergetics and Metabolism

Bioenergetics: Electron Transport chain and Oxidative Phosphorylation

Metabolism
Carbohydrates: Digestion and absorption, Glycolysis, TCA cycle, Metabolism of Fructose and Galactose.

Lipids: Digestion and absorption, Beta oxidation of fatty acids, Regulation of Cholesterol level in the cell and outline of lipid transport.

Proteins: Digestion and Absorption, Formation and Disposal of Ammonia, Urea Cycle, Special Products of Glycine, Tyrosine and Tryptophan.

UNIT V – Miscellaneous

Outlines of DNA organization, Replication, Transcription, Genetic code and Translation

Organ function Tests: Liver, Renal and Bone.

PRACTICAL

• Spotters

REFERENCE BOOK

4. BASICS IN MEDICAL PHYSICS AND ELECTRONICS (IE)

Unit I: Laser

Unit II: Radiation Physics

Unit III: Introduction to Imaging Technique

Unit IV: Semiconductor devices

Unit V: Biopotential Recording Systems

REFERENCE BOOKS:

2. Advanced Physics for you by Keith Johnson, Simmons Hewett, Sue holt, John miller
3. Christensen’s Physics of diagnostic Radiology by Thomas S. Curry III, M.D., Robert C Murry, Jr. PhD, Dow Dey, PhD.
5. ENGLISH (IE)

UNIT I: Spoken Communication
- Learning to read the phonetic symbols
- Stress
- Intonation
- Rhythm
- Commonly mispronounced words
- Correct pronunciation of important commonly used words in hospital practice

UNIT II: Vocabulary and Reading
- Special features of English vocabulary
- Common errors in choice of word
- Semi technical vocabulary
- Collecting material from library on scientific topics
- Comprehensive exercises

UNIT III: Writing
- Writing letters regarding permission, leave, opening bank account etc.
- Taking notes from lecture / reading materials
- Writing reports on patient care
- Summarizing scientific passages

UNIT IV: Grammatical and Idiomatic Usage
- Correction of errors
- Types of interrogative sentences
- Active-Passive voice
- Tense
- Principles of procession, clarity and specificity
6. BASIC OF COMPUTERS (IE)

UNIT I: INTRODUCTION

UNIT II: WORD PROCESSING

UNIT III: ELECTRONIC SPREADSHEET AND DATA PRESENTATION

UNIT IV: DATABASE MANAGEMENT SYSTEM

UNIT V: APPLICATIONS IN HEALTH CARE AND MEDICINE

ANESTHESIA & OPERATION THEATRE TECHNOLOGY

SYLLABUS - SEMESTER – II

1. MICROBIOLOGY (UE)

UNIT – I: General Bacteriology
Introduction & History of Microbiology, Classification & Morphology of Bacteria, Growth & nutrition, Culture Media & Methods, Sterilization & Disinfection, Fundamental aspects of antibacterial agents and antimicrobial susceptibility testing.

UNIT – II: Immunology
Infection, Immunity, Immunization schedule, applications of antigen antibody reactions, Hypersensitivity, Tumor & Transplantation Immunology.

UNIT – III: Virology
Introduction to virology, viral hepatitis, poliomyelitis, Rabies, Human immunodeficiency virus.

UNIT – IV Mycology & Parasitology
Introduction to mycology, pathogenic yeasts & fungi, Introduction to parasitology, Amoebiasis, Malaria, Helminthic infections.

UNIT – V: Applied Microbiology
Outline of common bacterial diseases, treatment & prevention-Respiratory tract infections (upper & lower), Meningitis (septic & aseptic), Enteric infections (food poisoning & gastro enteritis), Anaerobic infections, Skin & soft tissue infections, Urinary tract infections, Sexually transmitted diseases, Tuberculosis & Leprosy, Hospital acquired infections, Biomedical waste management.

PRACTICAL EXERCISES: Spotters, Gram staining.

REFERENCE BOOKS
1. Textbook of Microbiology by Ananthanarayan & Panicker’s, 8th edition-Universities Press (India) PVT LTD.
5. Publications.
2. PATHOLOGY (UE)

UNIT-I: General Pathology I: Cellular Pathology, Acute and Chronic Inflammation, Tissue Renewal
Regeneration and Repair, Hemodynamic Disorders Thromboembolic Disease and Shock

Introduction to Pathology, Adaptations Of Cellular Growth And Differentiation, Causes Of Cell Injury,
Mechanisms Of Cell Injury, Necrosis, Apoptosis, Pathologic Calcification, Cellular Aging, Acute
Inflammation – Mediators Of Inflammation Outcomes Of Acute Inflammation, Morphologic Patterns
Of Acute Inflammation, Chronic Inflammation – Causes Of Chronic Inflammation, Granulomatous
Inflammation, Healing By Repair, Scar formation And Fibrosis, Cutaneous Wound Healing, Healing
By First Intention, Healing By Second Intention, Edema, Hemostasis and Thrombosis, Infarction, Shock

UNIT-II: General Pathology II: Diseases of the Immune System, Neoplasia, Environmental And
Nutritional Disease, Diseases Of Infancy And Childhood

Innate Immunity, Adaptive Immunity, Components Of The Immune System, Mechanisms Of
Hypersensitivity Reactions, Acquired Immunodeficiency Syndrome (AIDS), Neoplasia – Definition
and Nomenclature, Characteristics Of Benign And Malignant Neoplasm’s, Molecular Basis Of
Cancer, Essential Alterations For Malignant Transformation, Clinical Aspects Of Neoplasia,
Laboratory Diagnosis Of Cancer, Common Environmental And Nutritional Pathology, Nutritional
Diseases, Tumors And Tumor-Like Lesions Of Infancy And Childhood

UNIT-III: Systemic Pathology I: Blood Vessels, the Heart, Red Blood Cell and Bleeding Disorders,
Diseases Of White Blood Cells

Arteriosclerosis, Atherosclerosis, Hypertensive Vascular Disease, Ischemic Heart Disease, Hypertensive
Heart Disease, Valvular Heart Disease, Infective Endocarditic, Rheumatic Fever And
Rheumatic Heart Disease, Cardiomyopathies, Leucopenia, Anemia’s, Polycythemia, Bleeding
Disorders, Reactive Proliferations Of White Cells, Definitions And Classifications of Lymphoid
Neoplasm’s and Myeloid Neoplasm’s, Splenomegaly.

UNIT-IV: Systemic Pathology II: The Lung, The Gastrointestinal Tract, Liver And Biliary Tract

Acute Respiratory Distress Syndrome, Obstructive Pulmonary Diseases, Pulmonary Infections,
Gastritis, Peptic Ulcer Disease, Inflammatory Bowel Diseases, Liver Function Tests, Hepatic
Failure, Cirrhosis, Portal Hypertension, Jaundice, Cholelithiasis

UNIT-V: Systemic Pathology III: The Urogenital System, the Breast, the Endocrine System, Bones
Joints and Soft-Tissue, Peripheral Nerve and Skeletal Muscle, the Central Nervous System

Renal Function Tests, Nephrotic Syndrome, Nephritic Syndrome, Urolithiasis, Pap Smear,
Carcinoma Of The Breast-Types And Classification, Thyroid Gland – Hyperthyroidism,
Hypothyroidism, Thyroiditis, Graves Disease, Diffuse And Multinodular Goiters, Parathyroid Glands –
Hyperparathyroidism, Hyperparathyroidism, Diabetes Mellitus, Fractures, Osteomyelitis, Arthritis,
Osteoarthritis, Rheumatoid Arthritis, Infectious Arthritis, Diseases of Peripheral Nerve, Diseases of
Skeletal Muscle, Infections of CNS – CSF Findings

REFERENCE BOOKS

1. Pocket companion to Pathologic Basis of Disease by Robbins and Cotran, 7th edition,
Saunders.

3. PHARMACOLOGY (UE)

UNIT-I: General Pharmacology

UNIT-II: Central Nervous System & Respiratory System

UNIT-III: Cardio vascular system & blood

Drugs used in Ischemic Heart Disease-nitrates-Calcium channel blockers-nifedipine, verapamil-list of other drugs – Beta blockers – propranolol, atenolol – metoprolol and antiplatelets – aspirin, clopidogrel, and names of other drugs-fibrinolytic drugs-streptokinase and other drugs, Drugs used in CCF-digoxin and list of other drugs useful in CCF, Shock. Diuretics: 4 groups – Thiazides, Loop diuretics, Potassium sparing and osmotic diuretics. Hypertension – outline of drugs used in hypertension, Rennin angiotensin system – ACE inhibitors – captopril, ramipril and names of other drugs – Receptor antagonist – losartan and list of other drugs, Antiarrhythmic drugs-classification – Quinidine, Lignocaine and amiodaron – Drugs for Hypercholesterolemia – statins. Drugs for anemia – oral & parenteral iron preparations, folic acid, vit B12 and erythropoietin. Coagulants and anti coagulants

UNIT-IV: Hormones and GIT

Contraceptives – oral and injectable, Corticosteroids – glucocorticoids – hydrocortisone-prednisolone-dexamethasone and names of topical steroids – Insulin – Oral hypoglycemic – sulphonyl urea’s, biguanides and others, Thyroid and Antithyroid drugs, Sex Hormones-Estrogen and anti estrogens, Progestin and Anti progestin’s, Androgen And anti androgens.

Emetics and anti emetics-metoclopramide and domperidone, Drugs used in peptic ulcer, constipation-lactulose & Diarrhea-ORS-Loperamide.

UNIT-V: Chemotherapy and Miscellaneous

drugs- acyclovir and anti HIV, Anti protozoals- metronidazole – Anthelmintics- albendazole-praziquantel.

Immuno modulators- cyclosporine, tacrolimus, azathioprine and steroids.

Toxicology-Drugs used in common poisoning, organophosphates, methyl alcohol, Benzodiazepam.

REFERENCE BOOKS:

1. Lippincott’s Illustrated Reviews: Pharmacology, 5th edition, by Richard A. Harvey and Pamela C. Champe, Lippincott Williams & Wilkins Publisher

4. ENVIRONMENTAL SCIENCE AND COMMUNITY MEDICINE (IE)

UNIT – I:

Ecosystems: Concept of an Ecosystem, Structure And Functions of an Ecosystem, Producers, Consumers and Decomposers, Cycles in the Ecosystem

Biodiversity: Introduction, Definition: Genetic, Species, Ecosystem diversity, India as a Mega Diversity Nation, Hotspots Of Biodiversity Threats to Biodiversity. Poaching of Wildlife, Man-Wildlife Conflicts, Endangered and Endemic Species Of India, Conservation of Biodiversity

UNIT – II:
Pollution: Definition, Causes, Effects and Control Measures of Air Pollution, Water Pollution, Pollution, Marine Pollution, Noise Pollution, Thermal Pollution, Nuclear hazards, Solid Waste Management role of Individuals in Pollution Prevention.

UNIT – III:

UNIT – IV:

UNIT – V:
Air: Composition The air of occupied room discomfort. Air pollution & its effects. Prevention & Control of air pollution

Ventilation: Definition Standards of ventilation Types of ventilation. Light, Noise & Radiation, Metrological environment, Housing, Disposal of waste Excreta disposal

PRACTICALS:

1. Epidemiology Problems
2. Environmental spotters

REFERENCE BOOK

5. BASICS OF NURSING (IE)

CONTENTS

UNIT I: Introduction of Health

Health care system, major health problems of the country, nature of disease pattern, technological advances and national health programmes, health for all by 2000 AD. Role of health care workers in the health care delivery system, impact of illness of the individual family and community.

• History of Nursing
• Communication Skills
• Relationship with patients, process of communication

UNIT II: Concept of Nursing

• Nursing Processes
• Problems solving approach, assessment, diagnosis, planning, implementation and evaluation.

Unit III: First Aid and Nursing in Emergencies

• Definition, basic principles, scope and rules
• Wounds, haemorrhages, shock, fracture, dislocation and muscle injuries, respiratory emergencies, resuscitation, unconsciousness, Miscellaneous conditions, burns, scalds, foreign bodies in the skin, eyes, ear, nose, throat and stomach.
• Frost bite, effects of heart cramps, bites and stings.
• Poisoning
• Transporting injured persons.

UNIT IV: Personal Hygiene and Health

• Care of skin, mouth, eyes, nails, hair
• Menstrual hygiene, clothing, mental health, common health problems of poor personal hygiene.
• Comfort, Rest and Sleep
• Hospital Housekeeping

UNIT V: Health Education

Introduction to principles and methods of health education. Use of audio visual aids, mass education, role of nurse in health education.

I.E.- Internal Examination.
*These examinations shall be conducted by the respective department.
ANAESTHESIA & OPERATION THEATRE TECHNOLOGY

SYLLABUS - SEMESTER-III

1. APPLIED ANATOMY & PHYSIOLOGY RELATED TO ANESTHESIA TECHNOLOGY-THEORY (UE)

Course objective

This course will provide an outline of anatomy and physiology to improve the students understanding of the technical and diagnostic procedures used, with special emphasis on applied aspects.

UNIT I. Respiratory System

A. Structure and function of the respiratory tract in relation to Anaesthesia – Nose, Pharynx, Larynx, Trachea & Bronchial tree – vessels, nerve supply, respiratory tract.

B. Respiratory Physiology-Respiratory muscles – diaphragm, intercostals, Lung volumes-dead space, vital capacity, FRC.

C. Oxygen: properties, storage, supply, hypoxia

UNIT II. Cardiovascular System

Anatomy – Chambers of the heart, circulation, ECG, Blood Pressure. How to measure? Hypotension & Hypertension.

UNIT III. Fluids And Electrolytes/Blood Transfusion-Body Fluids – Composition, I.V Fluids – composition & administration, I.V Cannulation, Blood grouping, Cross matching, Transfusion indications, hazards.

UNIT IV: Nervous System-Parts of Central & Peripheral Nervous System, Cerebro spinal fluid

UNIT V: Reproductive System: Physiological changes in pregnancy and labour

2. APPLIED ANATOMY & PHYSIOLOGY RELATED TO ANESTHESIA TECHNOLOGY PRACTICAL UE)

1. Model of respiratory tract
2. Spotters-pictures in anatomy and physiology of various systems
3. How to measure blood pressure
4. How to set up things for IV cannulation

Exam pattern (UE) total marks-60

1. Spotters 10 (10x2=20)
2. Charts/stations-5 (5x4=20)
3. Viva-20
3. PHARMACOLOGY RELATED TO ANESTHESIA TECHNOLOGY – THEORY (UE)

Course Objective

The course will provide training in general pharmacology with special emphasis on common drugs used, routes of administration, types of formulations, dose and frequency of administration, side effects and toxicity, management of toxic effects, drug interactions, knowledge of chemical and trade name, importance of manufacturing and expiry dates and instructions for handling of drugs.

UNIT I -

- Antisialagogues-Atropine, Glycopyrrolate
- Sedatives / Anxiolytics-Diazepam, Phenergan, Lorazepam.
- Narcotics-Morphine, Pethidine, Methoclopramide, Ondansetron
- Induction Agents-Barbiturates-Thiopentone, Benzodiazepines-Diazepam, Midazolam, Phencyclidines-Ketamine, Propofol

UNIT II – Antacids-

- Na Citrate. Gelusil, H2 Blockers-Ranitidine

UNIT III – Muscle relaxants & Anaesthetics

- Muscle Relaxants-Depolarizing – Suxamethonium, Non Depolarizing – Vecuronium, Atracurium, Narcotics – Morphine, Pethidine, Fentanyl, Fortwin, Tramadol
- Inhalational Gases-Gases-O2, N2o, Inhalation Agents – Halothane, Isofluranes, Sevoflurane
- Reversal Agents-Neostigming, Atropine, Glycopyrrolate, Naloxone, Flumazenil (Diazepam)
- Local Anaesthetics-Xylocaine, Bupivacaine – Topical, EMLA – Ointment.

UNIT IV – Emergency Drugs-

- Adrenaline: Mode of administration, dilution, dosage, effects, bicarbonate, calcium, ephedrine, xylocard,
- Other ionotroped: dopamine, dobutamine.
- Cardiovascular drugs-Antihypertensives, Antiarrhythmics, Beta - Blockers, Ca – Channel blockers, Vasodilators – (nigrogylycerin & sodium nitroprusside) Nitrates, sorbitrates, digoxin.
- Respiratory system-(Bronchodilators, respiratory stimulants), Renal system-(Diuretics, furosemide, mannitol)
- Obstetrics-(Oxytocin, methergin)

UNIT V- Miscellaneous

- IV fluids- various preparations NaCl, RL, haemaceal, hetastarch heparin.
- NSAID- Ibuprofen, ketrolac, paracetamol, diclofenac.
4. PHARMACOLOGY RELATED TO ANESTHESIA TECHNOLOGY – PRACTICAL (UE)

1. SPOTTERS
2. CHARTS
3. ANAESTHETIC INDUCTION AGENTS
4. INHALATION AGENTS

Exam pattern (UE) Total marks – 60

1. SPOTTERS – 10 (10x2=20)
2. CHARTS/STATIONS – (5x4=20)
3. VIVA - 20
5. BASIC PRINCIPLES OF HOSPITAL MANAGEMENT

(Common to all specialties – Anesthesia Technology, Cardiac Technology, Clinical Laboratory Technology, Renal Dialysis Technology, Radiology & Imaging Science Technology, Perfusion Technology, Cath Lab Technology & Blood Banking Technology)

UNIT I: Introduction to management & Organization:

UNIT II: Planning and Management of Hospitals & Clinical Services:

Building and physical layout – space required for separate function – Planning of infrastructure facilities, clinical services, equipment & Human resources – Types of Hospitals. Organization and administration of various clinical services; outpatient services. In-patient services, emergency services, operation theatres, ICU’s and super specialty services.

UNIT III: Organizing of support clinical services & Hospital management:

UNIT IV: Personnel and quality Management in Hospital & Marketing:

UNIT V: Ethical, current issues and Legal Aspects of Hospitals management services:

Operations Research and Quantitative Methods in Hospital Administration & Nursing Services in a Hospital.
6. COMPREHENSIVE VIVA

Comprehensive viva: Applied anatomy, physiology, pharmacology related to Anesthesia Technology (IE)

ANAESTHESIA & OPERATION THEATRE TECHNOLOGY

SYLLABUS

SEMESTER-IV

1. PRINCIPLES AND EQUIPMENTS RELATED TO ANESTHESIA TECHNOLOGY – THEORY (UE)

UNIT I: Medical Gas Supply

Compressed gas cylinders, Colour coding, Cylinder valves, pin index, Gas piping system, Alarms & safety devices.

UNIT II: Face Masks & Airway Laryngoscopes

1) Endotracheal tubes – Types, sizes, (RAE Tube, Flexo metallic). Complications – Use care and maintenance of anaesthesia equipment

2) Laryngoscopes in Anaesthesia

UNIT III: Machine breathing system

1. Anaesthesia Machine

Hanger and yoke system, Cylinder pressure gauge, Pressure regulator, Flow meter assembly, Vapourizers-types, hazards, maintenance, filling & draining, etc.

2. Breathing System

a. General considerations: humidity & heat

b. Common components – connectors, adaptors, reservoir bags, Capnography;

Pulse oximetry, Methods of humidification, Classification of breathing system, Mapleson system – a b c d e f, Jackson Reesystem, Bain circuit, Non rebreathing valves – ambu valves, The circle system, Components, Soda lime, indicators

UNIT IV: Familiarization of OT and OT techniques

UNIT V: CSSD, Instrumentation, store and inventory
2. PRINCIPLES AND EQUIPMENTS RELATED TO ANESTHESIA TECHNOLOGY – PRACTICAL (UE)

5. Cylinders, suction apparatus, endotracheal tubes, laryngoscopes, lmo, oropharyngeal airway.

6. Anaesthesia machine – description, parts, safety features

Exam pattern (UE)

5. Spotters – 10 (10x2=20)

6. Charts/stations – 5 (5x4=20)

7. Viva – 20
3. PRINCIPLES OF STERILIZATION TECHNIQUES – THEORY (UE)

UNIT I: Layout of OT and Lighting of OT

UNIT II: Cleanliness and sterilization of OT and Anaesthesia

Carbolization, fumigation, principles of sterilization – autoclaving, pressure sterilization, boiling, dry heat, gas chemical sterilization, gamma rays sterilization

UNIT III: OT preparation

1. Preparation of spinal / epidural / nerve block tray.

2. Preparation of patients for various types of anaesthesia including laying out of trolleys, preparation of Boyle’s apparatus for administration of anaesthesia, precaution to reduce antistatic friction hazards, preparation of sterile field, special precautions in handling patients with sepsis, blood borne infections – Hepatitis B, HCV, HIV, etc.,

3. Cleaning and Disinfection of articles and OT

4. Various positions during surgeries – lithotomy/kidney/beach chair/lateral/prone

UNIT IV: Electrical and fire hazards

Prevention of physical, electrical, chemical injuries and hazards to patients Ot pollution and scavenging

UNIT V: Care and Maintenance of Operation records of OT

1) Maintenance of septic OT, Use and maintenance of defibrillator, cautery, OT light, suction, emergency light etc.,

2) Admission and transfer procedures
4. PRINCIPLES OF STERILIZATION TECHNIQUES - PRACTICAL (UE)

1. Disinfectants

2. Methods of sterilization

3. various positions in surgery

Exam pattern (UE) Total marks – 60

1. SPOTTERS – 10 (10x2=20)

2. CHARTS/STATIONS – 5 (5x4=20)

3. VIVA – 20
5. HEALTH CARE MANAGEMENT (IE)

UNIT I: Concept of Health Care and Health Policy
Health in Medical Care, Indigenous systems of Health Care & their relevance, Framework for Health Policy Development.

UNIT II: Health Organisation
Historical development of Health Care System in the third world & India, Organization & Structure of Health Administration in India, Type of Health Organization including International Organizations, Private & Voluntary Health care Provider, Distribution of Health Care Services, Health Care System in Public Sector Organization, Health system of Various Countries.

UNIT III: Health Policy and National Health Programme
National Health Policy, Drug Policy, National Health Programs (Malaria, T.B., Blindness, AIDS etc.), Evaluation of Health Programs (Developing indicators for evaluation), Medical Education & Health Manpower Development.

UNIT IV: Health Economics-Fundamentals of Economics
Scope & Coverage, Demand for Health Services, Health as an Investment, Population, health of Economic Development. Economics of Health-

Population based health services, Economics of Communicable and Non Communicable diseases

UNIT V: Methods & Techniques of Economic Evaluation of Health Program
Cost Benefit & Cost Effective Methods.

- Household & Health
  Health Expenditure & Outcome, Rationale for Government action, Household capacity, income and schooling

- Health Insurance

Total No. of Credits-25
ANAESTHESIA & OPERATION THEATRE TECHNOLOGY
SYLLABUS

SEMESTER-V

1. Concepts of diseases and techniques in regional & general Anaesthesia including complications

Unit I: History of Anaesthesia

1) First successful clinical demonstration: Modern anaesthetic era – Balanced anaesthesia, Minimum standard of anaesthesia, Who should give anaesthesia?, Ten golden rules of anaesthesia, Assess & prepare, starve, check the drugs and equipment suction, keep the airway clear, be ready to control ventilation have a vein open, monitor pulse & BP, have someone in the room to apply cricoids pressure – if needed.

UNIT II: Investigations and Pre-anaesthetic orders

1) Routine – Urine, E.C.G, Chest x-ray

2) Patient – Informed consent, NPO

3) Premedication – advantages, drugs used, Special instructions – if any, Machine – Checking the machine, o2, N2O, suction apparatus, Laryngoscopes, ET tubes, airways, Things for IV accessibility, Other monitoring systems

4) Drugs – Emergency drugs, Anaesthetic drugs

UNIT III: Intraoperative management and Postoperative complications & management

1) Confirm the identification of the patient, Monitoring – Nonivasive & invasive monitoring, Induction – drugs used, Endotracheal intubation, Maintenance of anaesthesia, Positioning of the Patient, Blood / Fluid & electrolyte balance, Reversal from anaesthesia – drugs used, transferring the patient.

2) Recovery room – Set up, Things needed, Problems

3) Complications, Obesity, Anaemia

UNIT IV: Minor sequelae and Major catastrophes

1) Nausea & vomiting, Sorethroat, Laryngealgranuloma, Neurological complications, Awareness, Vascul

2) Mortality, Causes of death, Cerebral damage, Prevention
UNIT V: ANAESTHETIC consideration in

a) Cardiac disease – CAD, Valvular heart disease, congenital heart disease, Hypertension

b) Respiratory disease – COPD, Bronchial Asthma

c) Endocrine disease – DM, Thyroid dysfunction

d) Renal disease – CRF

e) Obesity
2. Concepts of diseases and techniques in regional & general Anesthesia including complications Practical (UE)

- Pre anaesthetic check, intraoperative monitoring
- Historical figures, instrument for endotracheal intubation, spinal and epidural anaesthesia.
- Basic anaesthetic consideration in patients with cardiac, respiratory and renal diseases

Exam pattern (UE) Total marks-60

- SPOTTERS – 10 (10X2=20)
- CHARTS/STATIONS – 5 (5X4=20)
- VIVA – 20
3. Anesthesia Techniques including complication (UE)

**UNIT I:** To setup the required equipments for general anaesthesia, spinal, epidural, nerve block.

**Unit II:** Monitoring during anaesthesia and complications

**UNIT III:** Monitoring and diagnostic procedures in ICU

Central venous access, ECG monitoring, Invasive hemodynamic monitoring

**Unit IV:** General care of patient in ICU-Eye, GI tract, Bladder, skin, Case of mechanically ventilated patient, Tracheostomy, humidification, Vascular lines – arterial, venous line, Radiography, Physiotherapy – chest physiotherapy

**Unit V:** Regional anaesthesia – Introduction, Indication, Contraindication, Check list, Procedure, Complications, Management, Spinal, Epidural, Nerve Block
4. Anesthesia Techniques including complications-Practical (UE)

1. How to assist anaesthetist?
2. Monitoring during anaesthesia and post operative period
3. General care of patient in icu
4. How to assist anaesthetist for central venous cannulation

Exam pattern (UE) Total marks-60

- SPOTTERS – 10 (10X2=20)
- CHARTS/STATIONS-5 (5X4=20)
- VIVA-20
5. (A) Hospital Products, Promotion, Sales & Public relations (or) Physician’s Office Management (IE)

UNIT I:

• An introduction to Marketing

• Services Marketing
  Classification of services – Characteristics of services and their marketing implication – Selecting appropriate tools for marketing.

UNIT II:

• Component of Service Marketing

UNIT III:

• Analysing Markets and Buyer Behaviour
  Model of consumer behavior – Factors influencing buyer behavior – Buying decision process

• Branding of a Hospital Facility
  Brand name and concept – Positioning hospitals – Developing and USP – Brand image – Image building – long term and short term activities.

UNIT IV:

• Other Marketing routes for Health Care Units
  Interpersonal communication – Print materials institutional marketing – seminars – conference

• Marketing Strategies for Hospital
  Managing Differentiation – Service Quality – Productivity – Product support service.

UNIT V:

• Evaluating and Controlling Market Performance
  Annual plan control (sales analysis – market share analysis – Marketing expense to sales analysis – Financial analysis), Profitability control, Efficiency control, Strategic control.
5. (B) Physician’s Office Management

UNIT I. Outpatient section

Registration of new cases, Registration of repeat cases, Patient record guide, Laboratory X – Ray reports & reports filing, Alpha index typing & Filing, O.P. Records coding (disease & indexing), O.P. records retrieval, O.P. Statistics

UNIT II. Inpatient Section

Admitting office procedure, Inpatient record removal & forwarding, Ward Census,

UNIT III. Assembling & deficiency checks I.P. record coding & indexing,

UNIT IV. Discharge Analysis

Incomplete record control, Completed record control, Medico legal procedures & issue of Medical certification, Record retention & destruction of O.P. & I. P. records,

UNIT V. Miscellaneous

Hospital reception, Secretarial practice, Library (Medical)

6. Comprehensive Viva

Total No. of Hours – 600 Hours

Total No. of Credits-25

U.E.-University Examination
I.E.-Internal Examination.
*These examinations shall be conducted by the respective department.
Course Objective

This course will cover anaesthetic techniques for various specialities including cardiac anaesthesia, neuroanaesthesia, obstetric anaesthesia, thoracic anaesthesia, paediatric anaesthesia and anaesthesia for shock and trauma. Upon completion of this course the students will be able to assist the anaesthetist in administration of anaesthesia required in various specialities.

UNIT I: Cardiac anaesthesia – PART1

NYHA classification, Arrhythmias, Angina, Dyspnoea, Premedication, Setting up of monitoring system, Monitoring – invasive and non-invasive,

UNIT II: Cardiac anaesthesia – PART2

Getting ready for the case, Induction of cardiac patient, precautions to be taken, Transferring the patient to ICU, Care to be taken, ICU management

UNIT III: Neuro Anaesthesia

Glasgow coma scale, Signs of raised ICT, Premedication, Check list, Induction of a patient Positioning in neuro surgery, I.C.P. monitoring, Air embolism, Transferring to I.C.U. Ward

UNIT IV: Anaesthesia for Trauma & Shock

Resusciation, Preopinvestigation/assessment, Circulatory management, Management of anaesthesia, Rapid sequence induction, Other problems

Unin V: CPR

BLS, ACLS
2. Anesthesia for specialties (Including Critical Care Assistance and Ventilation) Paper – I Practical (UE)

1. Spotters-basic anaesthetic considerations in cardiac and neurosurgery

2. Charts-BLS chain of survival

3. Demonstration-transfering of post operative patient to ICU

Exam pattern (UE) Total marks-60

1. SPOTTERS-10 (10X2)

2. CHARTS/STATIONS-5 (5X4=20)

3. VIVA-20
3. Anesthesia for specialties (Including Critical Care Assistance and Ventilation) Paper-II

UNIT I: Obstetric Anaesthesia (PART 1)

Differences between a pregnant and a normal lady, Risks for anaesthesia, Precautions to be taken Check list, regional vs general anaesthesia, Induction / maintenance.

UNIT II: Obstetric Anaesthesia (PART 2)

UNIT III: Paediatric Anaesthesia

Theatre setting, Check list, Premedication, Induction, Intubations-securing the ETT, Monitoring, Reversal & extubation – problems, Transferring / IC management, Pain management.

UNIT IV: Day Care Anaesthesia

Special features, Set up, Advantages, Disadvantages, Complications, Future

UNIT V: Anaesthesia Outside the O.R.

Situations, Cath lab, radiology and imaging Science Technology natural calamities, E.C.T., Features, Shortcomings, Complications
4. Anesthesia for specialties (Including Critical Care Assistance and Ventilation) Paper-II Practical(UE)

1. Spotters-common obstetric emergencies
2. Charts-situations requiring anaesthesia outside operation theatre
3. Demonstration-how is pediatric anaesthesia different from adult

Exam pattern (UE) Total marks-60

1. SPOTTERS-10 (10X2=20)
2. CHARTS/STATIONS-5(5X4=20)
3. VIVA-20
5. TRAUMA & CARDIAC LIFE SUPPORT (IE)

UNIT I. TRAUMA LIFE (Part 1)

- BLS,
- TRIAGE
  
  a. Primary Survey
  b. Secondary Survey
  
  - Airway & Ventilatory management
  - Shock
  - Central & peripheral venous access
  - Thoracic trauma – Tension pneumothorax
  - Other thoracic injuries
  - Abdominal trauma – Blunt injuries
  - Abdominal trauma – Penetrating injuries

UNIT II. TRAUMA LIFE (Part 2)

- Spine and spinal cord trauma
- Head trauma
- Musculoskeletal trauma
- Electrical injuries
- Thermal burns
- Cold injury

UNIT III. TRAUMA LIFE (Part 3)

- Paediatric trauma
- Trauma in pregnant women
- Workshop BLS
- Workshop cervical spine immobilization
- Imaging studies in trauma

UNIT IV. CARDIAC LIFE SUPPORT (Part 1)

- BLS
- The universal algorithm for adult ECC
- Ventricular fibrillation/Pulseless ventricular tachycardia algorithm
- Pulseless electrical activity (PEA) / asystole algorithm
- Bradycardia treatment algorithm
- Trachycardia Treatment algorithm
UNIT V. CARDIAC LIFE SUPPORT (Part 2)

- Hypotension / Shock
- Acute myocardial infarction
- Paediatric Advanced life support
- Airway management
- Defibrillation
- Drugs used in ACLS
- SEmergency Cardiac pacing
- AED
- Techniques for oxygenation and ventilation

6. CLINICALS IN ANESTHESIA FOR SPECIALTIES (INCLUDING CRITICAL CARE ASSISTANCE AND VENTILATION: COMPREHENSIVE VIVA (IE)
