

**Expert Lecture by
Prof. Giovanni Palmieri**
Senior Researcher of Automatic Control,
University of Sannio, Benevento, Italy.

**"AN INTRODUCTION AND NEW TRENDS, RESEARCH SCOPE IN CONTROL SYSTEMS", HELD ON
24th Sep, 2018**

In his key note address he briefed about Synthesis of control engineering for autonomous control system and its benefits of the full access in the Research Scope in Control Systems which will be very useful for them to be updated in the fast developing field. It is communication between IT systems and key processes such as machine control, secure information transfer, quality management and safety. The Programme was organized in collaboration Institute of Electrical and Electronics Engineers (IEEE) -Control Systems Society (CSS).

The Chief Guest is being Felicitated
